

# Spritely.js Tutorial

Laurie Shuck

Web Interaction and Animation

Presentation Assignment

July 24, 2014

For this assignment, I chose to research and teach about Spritely.js. During the Project Management and Assessment II course, I stumbled across a website (<http://sdrme.cal24.pl/ante/>) with quite a few animations, and I would like to learn how to make a similar site.

When the time came to choose a plugin, or library, other students had already picked the best scrolling plugins, and that is why I picked Spritely.js. The plugin does offer some image movement that I was interested in, and it was also great to learn about sprites since I have not used them in the past.

The following is a link to my Spritely.js Tutorial:
