

<Code>
Abode

Laurie Shuck
Project Assignment
Web Interaction and Animation
July 31, 2014

For this assignment, I have chosen to make the fictitious website Code Abode. I believe that this site would be a great place to display tutorial videos and web designs that I have created.

I have been in the process of moving this month, and thought it would be easiest to use my past school work as content.

Although I like this website, I plan to create a fabulous website for myself in the future, and when I do this site will give me an excellent place to start.

I really enjoyed the class, and learned a lot watching the videos.

Thanks,
Laurie

jQuery Effects:

1. Code Abode Logo Sprite--all pages
2. Turn On/Off the lights buttons on the Tutorials page
3. "Email Laurie" button toggles additional information on the About page footer

Map:

About Page, "Where I Live" section

Image Gallery:

Designs Page, Design Gallery section

HTML5 Video:

Tutorials Page (4 videos)

HTML5 Canvas:

1. Designs Page, Picture of hanging picture frames & the words "Design Gallery"
2. About Page, Picture of "I <3 Web Design & Development"

All images were created, or owned, by Laurie Shuck
Laurie Shuck created all videos.
